National Certificate in Business Analysis NQF Level 6

Programme overview

Business analysis is a vital instrument within the business environment to ensure that information technology is able to provide effective solutions for business enterprises. The development of business analysts through a suite of qualifications will have a positive impact on the broader economy of South Africa. It will also assist with bringing South Africa in line with international trends and satisfy industry requirements.

Programme outcomes

After completion of the programme, the learner will be able to analyse a business scenario, develop a business case, compile user requirement specifications, develop functional specifications and monitor quality assurance activities throughout the life cycle of the project. Ultimately, this qualification is aimed at improving the productivity and efficiency of business analysts within all sectors in South Africa.
